

Understanding Our Thai Teak Selection

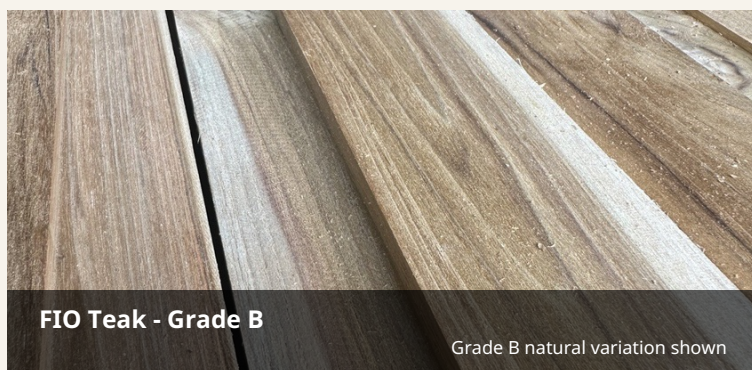

The names in this price list describe different aspects of the material. FIO Grade A and Grade B are appearance-selection grades. NS3 identifies a source category and should be assessed lot by lot.

FIO Teak - Grade A

SELECTED APPEARANCE / PREMIUM VISIBLE WORK

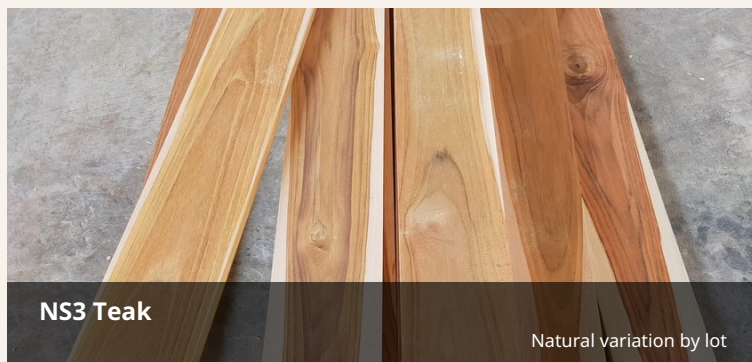

Selected plantation teak supplied through the Forest Industry Organization. Chosen for a higher proportion of heartwood, more consistent tone and grain, and fewer visible knots or defects.

FIO Teak - Grade B

NATURAL VARIATION / VERSATILE GENERAL USE

Teak from the same FIO plantation system, with a broader natural range. It may include more sapwood, sound knots and variation in colour or grain.

NS3 Teak

SOURCE CATEGORY / SELECTION REQUIRED BY LOT

A market term commonly used for privately grown teak associated with Nor Sor 3 land documentation. It is not a uniform appearance grade and should be selected by lot.

Thai Teak Price List - Category Notes

FIO GRADE A

Selected heartwood, colour and grain.

Prices exclude VAT and transportation. Availability and appearance are subject to current stock.

FIO GRADE B

Broader natural variation and sound knots.

NS3 TEAK

Source category; selection varies by lot.

Renewed Heritage Thai Teak

Existing teak, carefully prepared for a new life

Recovered from existing buildings and carefully inspected, cleaned and re-milled, reclaimed teak carries distinctive grain, warm tones and authentic marks shaped by time.

Our current stock measures at less than 8% moisture content. Its naturally seasoned condition improves dimensional stability and reduces shrinkage, warping and cracking. No lengthy drying period is required; production can begin after inspection and normal acclimatization.

EXTENDING THE LIFE OF EXISTING TEAK WHILE REDUCING THE NEED FOR NEWLY HARVESTED MATERIAL

Precision-milled teak flooring

Reference photograph: tongue-and-groove profile

FIO Teak Flooring

FIO Teak Flooring is a finished product format, rather than a separate species of teak. Each board is machined to a consistent profile for efficient installation and an orderly finished surface.

WHY SPECIFY IT

- Consistent dimensions and joint profile
- Available in plain or coloured finish
- Warm grain with natural tonal variation
- Suitable for residential and hospitality interiors

Flooring should be acclimatized at the installation site before laying. Final colour, grain and the proportion of heartwood or sapwood may vary by grade and production lot.
